Baramati, Maharashtra, India

CAREER OBJECTIVE

Second-year B.Tech (AI & Data Science) student with a foundation in Python, machine learning and computer vision, seeking AI/ML or Python internship opportunities to apply and strengthen practical skills through real-world projects.

EDUCATION

Vidya Pratishthan's Kamalnayan Bajaj Institute of Engineering & Technology (VPKBIET)

Baramati, India

B.Tech in Artificial Intelligence and Data Science | Sep 2025 – Jun 2029

Narmada Secondary and Higher Secondary Junior College

Mangrul, India

HSC (Science) – 83.50% | Jun 2024 – Feb 2025

TECHNICAL SKILLS

Languages: Python, C (Basic), Java (Basic)

AI/ML & Computer Vision: Machine Learning, Computer Vision, OpenCV, SFace

Development: React.js, FastAPI, Firebase, REST APIs

Tools & Deployment: Git, GitHub, Render, Firebase Hosting

Concepts: Object-Oriented Programming, File Handling, Error Handling, Problem Solving

Soft Skills: Communication, Presentation, Strategy

EXPERIENCE

Python Programming Intern | CodeAlpha

Sep 2026 – Present

Virtual / Online Internship

- Selected for CodeAlpha's Virtual Python Programming Internship, focused on practical assignments and projects in Python.
- Applying Python knowledge to hands-on tasks while strengthening programming and problem-solving skills.

PROJECTS

AI-Based Smart Attendance System | React.js, FastAPI, OpenCV, SFace, Firebase | Personal Project

- Built a full-stack, AI-powered multi-student face-recognition attendance platform with real-time camera-based detection, unknown-person rejection and duplicate-attendance prevention.
- Designed an academic management module covering academic year, course, branch, semester, division, class and subject, with teacher and admin dashboards.
- Tuned recognition thresholds and confidence checks to reduce misassignment of student identities across multi-face scenarios.
- Deployed as an installable PWA with HTTPS-enabled camera access on Firebase Hosting + Render, accessible from any device or network.

Console-Based Banking System | Python, OOP, File Handling | Feb 2026 – Present

- Developed a command-line banking application supporting 4-digit PIN authentication, deposits/withdrawals and real-time balance updates.
- Implemented persistent file-based data storage and timestamped transaction-history logging.
- Applied object-oriented design and structured error handling to build a restart-safe application.

CERTIFICATIONS

- Python for Beginners – SkillUp by Simplilearn
- C Programming Basics – SkillUp by Simplilearn (Jan 2026)
- 2-Day Gen AI Mastermind – Outskill
